A district may choose to allocate its expenditures on this tab. Districts may allocate districtwide expenditures to schools, private schools or CTEDs by entering a positive amount in the applicable school's column, which will automatically reduce the corresponding districtwide amount. Additionally, districts may allocate expenditures between schools, including private schools and CTEDs. If the expenditure at a school is to be increased, the amount should be entered as a positive number. If the expenditure at a school is to be decreased, it should be entered as a negative number. Use the applicable column to designate between local & State or federal sources. Once allocations have been made, any remaining districtwide amounts will be reported as shown in column D. Click this box for more detailed instructions.
