

## **NOTICE OF PROPOSED CURRICULUM ADOPTION**

Good morning SOCUSD community,

The administration is currently recommending the adoption of **enVision Mathematics** by SAAVAS for grades K-8. A pilot of the curriculum during the 2022-2023 school year found this math program to be comprehensive with high-interest, engaging content for students. It includes real-world math application through project-based learning, as well as ample opportunity for students to learn and practice math problem-solving skills. The program also includes supplemental instructional materials for Language Support, Differentiation, Intervention/Remediation, and Challenge/Enrichment.

Samples of the curriculum will be on display in the offices of West Sedona School and Sedona Red Rock Jr/Sr High School for 60 days. If you would like to come in and look through the books, you may do so at any time Monday through Friday from 8:00 a.m. to 3:00 p.m. The Board will officially vote on the adoption at the September 2022 Board meeting.

Should you have any questions or comments, please contact Deana DeWitt at 928-204-6836 or [dewitt@sedonak12.org](mailto:dewitt@sedonak12.org).
